

Aluminum Fiber Splice Trays

Part Numbers:

FE-SPLC6-M

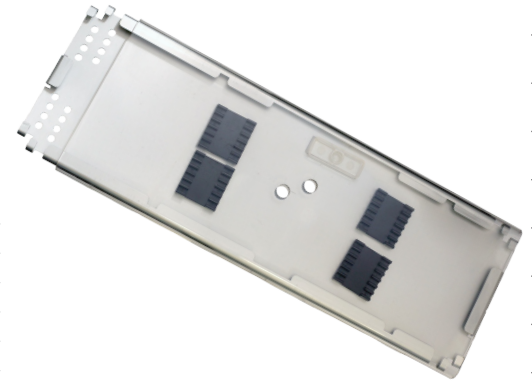

FE-SPLC12-M

FE-SPLC24-M

Description

Fiber splice trays are designed with durability, weight reduction & ease of use in mind. They are used in a wide range of applications and made to sit over pre-installed wire management inside our enclosures. The clear ruggedized polycarbonate cover simplifies visual inspection, fiber routing and trouble-shooting while protecting fusion splicing – both heat-shrink and mechanical splices. Two mounting holes provide flexibility in securing trays to enclosures.

Each tray comes with universally adaptable peel & stick black fusion splice chips.
12 fiber trays come with 2 splice chips and space bar
24 fiber trays come with 4 splice chips and space bar.

Dimensions

FE-SPLC6-M

Length	7" (17.78 cm)
Width	4" (10.34 cm)
Height	0.31" (0.787 cm)

FE-SPLC12-M

Length	11.75" (29.84 cm)
Width	4" (10.34 cm)
Height	0.31" (0.787 cm)

FE-SPLC24-M

Length	11.75" (29.84 cm)
Width	5" (12.60 cm)
Height	0.31" (0.787 cm)
